

NATIONAL ORCHID SHOW

WESTERN CAPE · 2027

IDENTITY — 2027

National Orchid Show Logo

With the *Disa graminifolia* mark.

The approved signature for the 2027 show — emblem, wordmark and location line as one object. Shown in full colour, grayscale and single ink, across both lockups and both grounds. The wordmark, location line and geometry are unchanged from the July 2026 approval.

EMBLEM

Disa graminifolia

LOCATION LINE

Jost 500 · 0.30em

WORDMARK

Cormorant Garamond 500

RENDITIONS

Colour · Grayscale · Single ink

Three renditions

The emblem is trimmed to its bounding box, so the petal tips define the mark's edges. It exists in three renditions: the supplied full-colour illustration, a neutral grayscale for single-colour reproduction, and a single-ink version drawn in one of the four approved brand colours.

FULL COLOUR

GRAYSCALE

SINGLE INK — ROYAL PURPLE

Full colour

The illustration as supplied. Strongest at large sizes — show signage, certificates, covers and the website masthead. Both lockups, both grounds.

Grayscale

One neutral rendition serves every ink. Use it for newsprint, engraving, certificates printed in one colour and single-colour merchandise. On dark grounds the drawing is not inverted — the same tonal order is lifted into a high-key plate, so the petals stay light and the throat keeps its shading.

Single ink — the working rendition

The everyday mark for one-colour work: embroidery, foil, screen print, stamps and vinyl. Royal purple is the default. The ink is interchangeable with the three other brand colours without changing anything else in the lockup.

PALE GOLD REVERSED ON ROYAL PURPLE

Palette

Four core hues, approved by committee in 2025. Royal purple is the primary ink and carries all type; the two olives are accents for rules, location lines and small marks; pale gold is the paper ground.

Royal purple

Ground

SAMPLED FROM THE EMBLEM — NOT RATIFIED

A violet and a studio black are sampled from the illustration itself, for interface states and photographic grounds. They are not committee-approved and must not carry type.

Violet #7E3F97

Studio black #141414

White #FFFFFF

GROUND RULE

One or two background colours per layout. Light surfaces are pale gold or white; dark surfaces are royal purple or photographic black. No gradients, no textures.

Typography

Two faces, both open-licensed. The contrast between Cormorant Garamond's delicate high-contrast serif and Jost's calm geometry is the typographic signature. Montserrat, which belonged to the retired badge logo, is no longer part of the system.

DISPLAY & WORDMARK

Cormorant Garamond

Disa graminifolia

NATIONAL ORCHID SHOW

Weights 400–500 only, never heavy. Headlines sentence case; caps tracked 0.16em. The italic is the expressive voice — use it for species names.

UI, LABELS & BODY

Jost

Join growers, judges and enthusiasts from across South Africa for three days of displays, talks and the national judging.

WESTERN CAPE · 2027

Weights 300–600. Body sentence case at 15–17px. Eyebrows and section labels are wide-tracked caps. The lockup's location line rides on 0.30em tracking.

Spacing

An 8px base grid, used generously. Containers run to roughly 1080px with wide outer margins; the brand's calm comes from the space it leaves, not the elements it adds.

SCALE — MULTIPLES OF EIGHT

-  8 · hairline gaps, icon padding
-  16 · label to element
-  24 · inside cards
-  40 · card padding, column gaps
-  64 · block to block
-  96 · section to section

SURFACES

Radii are 10px for cards, 16px for large surfaces, 999px for pills; the emblem is a true circle. Primary borders are 1.5px, hairlines 1px — the emblem is drawn with a weighted outline and the linework should match it.

CARD

10px radius · 1px royal purple at 14% · soft purple-tinted shadow, low and wide. Never a harsh black shadow, never a coloured left-border stripe.

Clear space and minimum size

Clear space on all four sides equals one quarter of the emblem width, measured from the outermost petal tips and the ends of the location line. Nothing sets inside it — not type, not rules, not the edge of a photograph.

CLEAR SPACE — ONE QUARTER OF THE EMBLEM WIDTH

MINIMUM SIZE

96

64

44

32

24

Minimum emblem height is 24px on screen and 8mm in print. Below that the throat detail closes up; set the mark larger rather than simplifying it. Because the emblem is raster artwork, large-format signage and embroidery need a vector trace from the original illustration.

When the emblem may stand alone

The logo is the emblem, wordmark and location line together. The emblem separates from the name only where the name physically cannot follow, or where the name is already present in the same field of view.

Social avatar

App icon

Favicon

Seal, stamp, sticker

PERMITTED

Avatars, app icons and favicons, where the surface is too small or too square for the wordmark.

Seals, wax stamps, lapel pins, stickers and rosettes at judging.

As a repeating device on endpapers, ribbons or exhibitor lanyards, where the full logo already appears elsewhere on the piece.

As a section anchor inside a document whose cover carries the full logo.

NEVER

As the signature on a first or only surface — covers, signage, certificates, advertising and email footers all take the full logo.

Beside another organisation's logo, where the show must be named.

With the name set nearby in another typeface — that is a rebuilt lockup, not a standalone emblem.

Below 24px on screen or 8mm in print.

Lockup specification

Sizes are expressed against the emblem height so the lockup scales as one object. Nothing in the lockup is set independently.

Horizontal

WORDMARK	Cormorant Garamond 500 · height × 0.34 · tracking 0.13em · leading 1.04
----------	---

LOCATION LINE	Jost 500 · height × 0.145 · tracking 0.30em · uppercase
---------------	---

GAP	Emblem to type, height × 0.20; wordmark to location line, height × 0.11
-----	---

ALIGNMENT	Type block left aligned, optically centred on the emblem
-----------	--

ON DARK	Wordmark pale gold; location line Green 1, or 70% white on black
---------	--

Vertical

WORDMARK	Cormorant Garamond 500 · tracking 0.15em · centred, single line
----------	---

---------------	--

EMBLEM WIDTH	Half the wordmark's rendered width, centred on its axis
--------------	---

GAP	Emblem to wordmark, height × 0.14
-----	-----------------------------------

RULE	Optional hairline between wordmark and location line, at the wordmark's width
------	---

Use and misuse

DO

Set the lockup as one object at the specified proportions, emblem at half the wordmark width.

DON'T

Do not re-space the gap, letter-space the wordmark, or float a small emblem above the name.

Keep the emblem's proportions, and set all type in royal purple on light grounds.

Do not stretch the emblem, and do not set the wordmark in olive — the olives are accents only.

Use and misuse, continued

DO

On black, use the high-key grayscale plate — petals stay light and the throat keeps its shading.

DON'T

Do not use the flat single-ink silhouette for general work. It loses all internal detail; reserve it for genuine one-ink processes such as embroidery and foil.

Keep the full-colour lockup on a flat pale gold, white, royal purple or black ground.

Do not set it on violet, on any mid-tone accent, or on a busy photograph. Contrast collapses and the flower disappears into the ground.
